PROFESSIONAL SUMMARY

Passionate Full Stack Developer with hands-on experience building production-grade, SEO-optimized web applications end-to-end. Specialized in React (TanStack ecosystem) on the frontend and ASP.NET Core with PostgreSQL on the backend. Delivered 3 complete full-stack projects covering real-world challenges: JWT & OAuth authentication, role-based access control, RESTful API design, cloud deployment, bilingual RTL support, and third-party integrations.

TECHNICAL SKILLS

Frontend:	React 18, TypeScript, TanStack Router, TanStack Query, Tailwind CSS v4, Shadcn/UI, Framer Motion, GSAP, React Hook Form, Zod, Axios
Backend:	ASP.NET Core 10, C#, Entity Framework Core, RESTful APIs, JWT Auth, Google OAuth, AutoMapper, FluentValidation, Swagger
Database:	PostgreSQL, EF Core Migrations, Npgsql
Tools:	Git, GitHub, Vite, Cloudinary, i18next (RTL / Bilingual), jsPDF, SEO Optimization
Hosting:	Vercel, Railway, Cloudflare Workers

PROJECTS

ClinIQ — Healthcare Appointment Booking Platform | clin-iq-frontend.vercel.app

- Built a full-stack clinic booking system with separate dashboards for Patients, Doctors, and Admins.
- Implemented multi-step appointment booking, doctor search & filtering by specialty and city, and medical records management.
- Integrated Google OAuth, JWT authentication, and FluentValidation for secure and validated API endpoints.
- Delivered full bilingual support (Arabic / English) with RTL layout using i18next; animated with GSAP + Framer Motion.
- Generated downloadable medical records as PDFs using jsPDF; images managed via Cloudinary.

Stack: React 18 · TanStack Router · TypeScript · Tailwind CSS v4 · GSAP · ASP.NET Core 10 · PostgreSQL · JWT · Google OAuth · Cloudinary · Vercel · Railway

Nexus — Project Management Tool | <https://nexus.t9am-w0rk.workers.dev/>

- Developed a collaborative project management platform with Kanban boards, task tracking, and threaded comments.
- Built real-time notifications, user onboarding flow, profile settings, and a full Admin panel.
- Implemented complete authentication: Google OAuth, JWT, email/password login, and password reset via email.
- Structured backend with AutoMapper, EF Core + PostgreSQL, and clean controller/service separation.

Stack: React · TanStack Start · TypeScript · Tailwind CSS · Framer Motion · ASP.NET Core · PostgreSQL · JWT · Google OAuth · AutoMapper · Cloudflare Workers

Smart Vibe — Full Stack E-Commerce Platform | <https://smartbayt-frontend-eight.vercel.app/>

- Built a complete smart-home appliances store with product catalog, cart, wishlist, and order management.
- Implemented discount coupon system (percentage & fixed value) and product reviews with admin approval workflow.
- Created a full Admin Panel for managing products, orders, users, coupons, and reviews.
- Integrated Cloudinary for image uploads; deployed frontend on Vercel and backend + DB on Railway.

Stack: React 18 · TypeScript · Vite · Tailwind CSS · Shadcn/UI · TanStack Query · ASP.NET Core · PostgreSQL · JWT · BCrypt · Cloudinary · Vercel · Railway

EDUCATION

Zagazig University

Faculty of Agriculture · Agricultural Sciences · 2022 – 2026
